Human Resource Manager
Rebase Ventures
Nairobi, Kenya

7th May, 2019

Dear Sir/Madam,

My name is Kernael Apuko and I am a software Engineer. I have been developing websites and applications for around 1 year. Most my experience lies in full stack development and macOS server administration. I have worked with HTML5/CSS3, Javascript/Angular, and python/Django.

I am excited to be applying for a Full Stack Software Developer position at Rebase Ventures. I came across this position on ihub and after reviewing it, I confidently think my skills are a perfect match to your needs.

You will find high level summaries of my job duties/education history in my resume. If you want to see some of the projects that I work on in my spare time, see my GitHub profile: https://github.com/Kernael92 and my portfolio site: https://kernel-portfoloi.herokuapp.com.

My github profile will give you a sense of the technologies that I work with frequently. Most of my work has not been open sourced unfortunately. However, I am more than happy to create a sample web application project to showcase my full stack software development skills.

I enjoy being challenged and engaged in projects that require me to work outside my comfort zone and knowledge set. Rebase Ventures will not only give me an opportunity to exercise my design and creativity skills but also a chance to collaborate with my colleagues and work independently as well.

Thank you for taking time to review my application. I look forward to hearing from you in the near future.

Best,

Kernael Apuko.
